Summary

- I'm Ibrahim Ahmed Abdel Naby, I studied computer science at the Faculty of Computers and Artificial Intelligence CS major at Helwan University in Egypt.
- With over one year of experience as a hardworking Software Engineer, I became capable of achieving set goals in a given time frame and coming up with innovative solutions.

Skills

JavaScript, Typescript, Node.js, Express.js, PostgreSQL, HTML5, CSS, Jasmine Framework, REST APIs

Projects

Hosting a full stack application: [Github Link](#)

- Deploy a full-stack application to a cloud service provider so that it is available to customers.
- It uses CircleCi connected to a GitHub account. Based on the manual steps used to deploy the app

Storefront Backend [Github Link](#)

- A backend for online shopping requires me to architect the database, tables, and columns to fulfill the requirements.
- Create a RESTful API to be accessible to the frontend developer, with tested written and secure user information with encryption, and provide tokens for integration into the frontend.

Image-Processing-API [Github Link](#)

- An API for doing some operations on images like resizing, crop, grayScale, blur, and response with processed images.

Weather-Journal App [Github Link](#)

- An asynchronous web app that uses Web API and user data to dynamically update the UI.

Experience

Udacity

Full Stack Developer • Elbadrashin, Giza
